THE ENTERTAINING KITCHEN

This young professional wanted a space that reflected his passion for entertaining. Removing walls and rearranging the kitchen components opened the floor plan. New stainless-steel appliances, including a wine cooler, humidor and built-in espresso machine, were included to add to the contemporary ambience. The bold color of the countertop reflects a modern and whimsical feel in the Asian-inspired decor.

One of the many features is a 42-inch flat screen that rises out of a custom cabinet and rotates 180 degrees at the touch of a button. Other highlights include vertical grain bamboo and stained maple cabinets, as well as a raised circular island.
